

Updated March 4, 2016

Approved Unmanned Aerial Systems (UAS) Make/Model under Section 333

This is a list of UAS previously approved by the Secretary of Transportation under Section 333 of the 2012 FAA Modernization and Reform Act. The UAS below were submitted to the FAA in petitions for exemption for UAS operations. It includes UAS readily available for purchase as well as those built by petitioners which are not available for purchase from retailers. The list is not an endorsement by the FAA of any UAS. Currently, commercial, and other non-model aircraft, operations require an exemption, valid Section 333 determination, and a Certificate of Waiver or Authorization (COA). Operators are required to register their UAS, and operate within requirements established in the rule, exemption, and the COA. For more information, please visit https://www.faa.gov/uas/legislative_programs/section_333/how_to_file_a_petition/. This list will be updated monthly.

1. 3D Robotics Aero
2. 3D Robotics Aero-M
3. 3D Robotics ArduCopter Hexacopter
4. 3D Robotics DIY Quad Kit
5. 3D Robotics Fixed Wing Plane
6. 3D Robotics Iris
7. 3D Robotics Iris +
8. 3D Robotics Multirotor
9. 3D Robotics Quad-D
10. 3D Robotics Quadrotor
11. 3D Robotics Solo
12. 3D Robotics Solo Agco
13. 3D Robotics Spektre
14. 3D Robotics X4
15. 3D Robotics X8
16. 3D Robotics X8 + (tethered)
17. 3D Robotics X8+
18. 3D Robotics X8-M
19. 3D Robotics Y6
20. 3i Project Management 2Seas-20
21. A2Tech RV-02
